PROFILE

Driven software engineer with over three years of industry experience, specializing in crafting elegant solutions to complex technical challenges. Passionate about leveraging technology to create innovative software products that make a meaningful impact. Known for my strong analytical skills, attention to detail, and ability to collaborate effectively with cross-functional teams. Thrive in dynamic and fast-paced environments, where I can continuously learn and grow as a professional. Dedicated to delivering high-quality, maintainable code that meets both user needs and business objectives

EDUCATION

BS Software engineering   2018 – 2022
Fast university

PROFESSIONAL EXPERIENCE

Senior Software engineer - Remote   07/2023 – present
Polyphasic Devs 🔗   London,
                                                                          United Kingdom
With expertise in front-end development, I have honed my skills in React.js to craft seamless user interfaces and engaging web experiences. My proficiency extends to integrating APIs, including ChatGPT, to enhance functionality and user interaction. Leveraging AWS for deployment, I ensure scalable and efficient deployment solutions. My experience in React.js, API integration, and AWS deployment culminates in a comprehensive skill set poised to drive innovation and excellence in web development projects.

Software engineer- Remote   06/2022 – 06/2023
Devsinc 🔗   santa clara, USA
I spearheaded projects in the AI domain, notably the "Grants AI" initiative, where I orchestrated the extraction of data from the UK Charity Commission website. This data powered our applications focused on grants and fundings, enriching them with vital insights. Employing ChatGPT, I engineered a chatbot to streamline user interactions and enhance engagement. Additionally, I contributed to a Next.js project, developing a yoga training application. Within this platform, built entirely in Next.js, I crafted a robust training environment, fostering seamless user experiences and optimizing performance.

SKILLS

React JS	Redux toolkit queries
Django Rest Framework	Node JS
Next JS	AWS
Vercel	Debugging

PROJECTS

Clean App 🔗
Team Lead
This platform represents a breakthrough in simplifying the process of finding and booking cleaning services, showcasing our adeptness in crafting practical, user-centric applications tailored to meet tangible, everyday requirements. With a focus on user convenience, the seamless web application ensures a hassle-free experience, accessible across various devices thanks to its mobile-responsive design.

Moreover, recognizing the growing demand for on-the-go solutions, we are poised to extend our reach further by launching a native application, soon to be available in leading app stores. This transition to a native app underscores our commitment to delivering a seamless and intuitive experience, tailored specifically to the unique capabilities and interface standards of mobile devices.

Yoga App 🔗

Senior Software engineer

YogaStickmen, a cutting-edge yoga training application meticulously crafted with Next.js, redefines the paradigm of digital wellness. Seamlessly blending intuitive design with advanced functionality, YogaStickmen offers a dynamic platform for yoga enthusiasts of all levels. Through a sleek and responsive interface, users embark on a transformative journey, guided by a virtual roster of animated stick figures demonstrating yoga poses with clarity and precision. Harnessing the power of Next.js, YogaStickmen ensures lightning-fast performance and seamless navigation, enhancing the user experience. Whether users seek to deepen their practice, explore new techniques, or simply unwind, YogaStickmen empowers them with a comprehensive toolkit for holistic well-being, accessible anytime, anywhere.

Happy Hot Tubs 🔗

Senior Software Engineer

Happy hot tubs, a premier destination for high-quality hot tubs, accessories, and maintenance services. At Happy Hot Tubs, we are dedicated to providing our customers with the ultimate relaxation experience, right in the comfort of their own homes.

Groove 🔗

Groove.co is a sales engagement platform designed to streamline communication and increase productivity for sales teams. With powerful features like email tracking, cadence automation, and analytics, Groove.co helps sales professionals effectively engage with prospects and customers. The platform integrates seamlessly with leading CRM systems, providing a centralized hub for managing customer interactions. Its intuitive interface and customizable workflows empower users to personalize their sales outreach and drive better results. Whether managing outbound campaigns, tracking engagement metrics, or collaborating with team members, Groove.co offers a comprehensive solution for modern sales teams. Experience the future of sales engagement with Groove.co today.

Outsell 🔗

Outsellinc.com is a leading research and advisory firm specializing in the automotive, information services, and technology industries. Through in-depth market analysis, industry insights, and strategic guidance, Outsellinc.com helps clients make informed decisions and drive business growth. The website offers a wealth of resources, including research reports, webinars, and blog articles, to keep clients updated on the latest trends and developments in their respective industries. With a team of seasoned analysts and consultants, Outsellinc.com provides tailored solutions to address the unique challenges and opportunities facing each client. Whether navigating market disruptions, exploring new growth opportunities, or optimizing business strategies, Outsellinc.com is a trusted partner for organizations seeking to stay ahead in today's competitive landscape.
